Replace cap and store in cool dark place. <b>Batch No:</b> KA00108709 Manufactured by Klüber Lubrication, München, Germany Packaged by Recapping Digital Ltd
---	---

Studer tape recorders were designed to work all day, everyday in recording studios and broadcasting organisations around the world, often in less than ideal conditions.

In order to uphold their legendary reputation for quality and reliability, Studer engineers went to a lot of trouble to ensure that the main capstan motor would always work reliably and noiselessly. So if your capstan motor has the orange label specifying Klüber Constant GLY 2100, that is what you need to use.

Don't think about using inferior substitutes such as 3-in-1, WD40, sewing machine oil, or even Mobil One!

Get the right lubricant to keep your machine running as it should. One small bottle should last several years.
